

EDOPAN Panel Kalıpları

Yüksek yapılar, iş ve alışveriş merkezleri, metro yeraltı istasyonları, endüstriyel yapılar, enerji tesisleri, hastane sağlık tesisleri, istinat duvarları, izolasyon perdeleri, HES projeleri, baraj gövdeleri vb. projelerde kullanılır. Özel formlu profil panelin tekrar ve uzun süreli kullanımına olanak sağlar. Profilin yapısı sayesinde özel kilitler ile istenilen noktadan birbirleri ile bağlanabilirler. Profilin özel formu sayesinde plywood profile tamamen oturur ve bu sayede plywood dış etkenlerden korunur. Şantiyeye kullanıma hazır halde teslim edilir. Panellerin kurulumu ve sökümü oldukça kolaydır. Farklı ebatlardaki paneller birbirlerine istenildiği gibi bağlanabilir. Tırmanma sistemleri, shaft platformları, tekyüzlü kalıplar ile birlikte kullanılabilir. Perde kalıpları için standart paneller ve kolon kalıpları için ayarlı paneller olarak 2 farklı türde imal edilir. Perde kalıplarında iç köşe - dış köşe ve açılı perde imal edebilmek için özel parçaları vardır. 80 kN/m^2 taze beton basıncına göre dizayn edilmiştir.

EDOPAN Panel Formworks

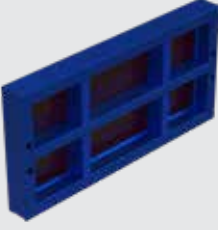

High buildings, business and shopping centers, metro underground stations, industrial structures, energy facilities, hospital medical facilities, retaining walls, isolation screens, HEPP projects, dam bodies etc. used in projects. It allows for long and repeated usage of special profile panel. Through to the profiling structure, special locks can be connected with each other from desired point. Through to Profile's special form, the plywood profile is fully occupied and plywood is protected from external factors. Site use is delivered ready to use. Installation and disassembly of panels is very easy. Panels of different sizes can be connected to each other as desired. Can be used with climbing systems, shaft platforms, single sided formworks. It is manufactured in 2 different types as standard panels for wall formworks and as adjustable panels for column formworks. In the wall formworks there are special pieces to make inner corner - outer corner and angle wall. Designed for fresh concrete pressure of 80 kN / m^2 .
